

**St. Benedict's Primary School**  
**SCIENCE**  
**KNOWLEDGE AND SKILLS BUILDER**

Science element from the National Curriculum – Working Scientifically

Phase	Context for learning	Knowledge and Skills for Working Scientifically
KEY STAGE 1	<p><b>Y1 Autumn 1</b>  <b>ILP Enchanted Woodlands</b>  <b>Programmes of Study</b>            Identify and Classify</p> <p>Use their observations and ideas to suggest answers to questions.</p> <p>Perform simple tests</p> <p>Observe closely using simple equipment</p>	<p><b>Skills</b>            Observe objects, materials, living things and changes over time, sorting and grouping them based on their features.</p> <p><b>Knowledge</b>            Objects, materials and living things can be looked at and compared.</p> <p><b>Skills</b>            Talk about what they have done and say, with help, what they think they have found out</p> <p><b>Knowledge</b>            The results are information that has been found out from an investigation.</p> <p><b>Skills</b>            Observe the local environment throughout the year and ask and answer questions about living things and seasonal change.</p> <p><b>Knowledge</b>            The local environment is a habitat for living things and can change during the seasons.</p> <p><b>Skills</b>            Begin to notice patterns and relationships in their data and explain what they have done and found out using simple scientific language</p> <p><b>Knowledge</b>            The results are information that has been found out from an investigation and can be used to answer a question.</p> <p><b>Skills</b>            With support, follow instructions to perform simple tests and begin to talk about what they might do or what might happen.</p> <p><b>Knowledge</b>            Simple tests can be carried out by following a set of instructions</p> <p><b>Skills</b>            With support, use simple equipment to measure and make observations.</p> <p><b>Knowledge</b>            Simple equipment is used to take measurements and observations. Examples include metre sticks, measuring tapes, egg timers and hand lenses.</p>

<p>Ask simple questions and recognise that they can be answered in different ways.</p> <p><b>Y1 Spring 1</b> <b>ILP Superheroes</b> <b>Programmes of Study</b> Identify and Classify</p> <p>Use their observations and ideas to suggest answers to questions.</p> <p>Perform simple tests</p> <p><b>Y1 Spring 2</b> <b>ILP Beachcombers</b> <b>Programmes of Study</b> Identify and Classify</p> <p>Perform simple tests</p> <p>Observe closely using simple equipment</p>	<p>Ask simple scientific questions.</p> <p><b>Knowledge</b> Question words include what, why, how, when, who and which.</p> <p><b>Skills</b> Observe objects, materials, living things and changes over time, sorting and grouping them based on their features.</p> <p><b>Knowledge</b> Objects, materials and living things can be looked at and compared.</p> <p><b>Skills</b> Talk about what they have done and say, with help, what they think they have found out</p> <p><b>Knowledge</b> The results are information that has been found out from an investigation.</p> <p><b>Skills</b> With support, follow instructions to perform simple tests and begin to talk about what they might do or what might happen.</p> <p><b>Knowledge</b> Simple tests can be carried out by following a set of instructions.</p> <p><b>Skills</b> Observe objects, materials, living things and changes over time, sorting and grouping them based on their features and explaining their reasoning.</p> <p><b>Knowledge</b> Objects, materials and living things can be looked at, compared and grouped according to their features.</p> <p><b>Skills</b> With support, follow instructions to perform simple tests and begin to talk about what they might do or what might happen.</p> <p><b>Knowledge</b> Simple tests can be carried out by following a set of instructions.</p> <p><b>Skills</b> With support, use simple equipment to measure and make observations.</p> <p><b>Knowledge</b></p>
--	--

<p>Ask simple questions and recognise that they can be answered in different ways.</p> <p><b>Y1 Summer 1</b>  <b>ILP Paws, Claws and Whiskers</b>  <b>Programmes of Study</b>  Gather and record data to help in answering questions.</p> <p>Identify and Classify</p> <p>Perform simple tests</p> <p><b>Y1 Summer 2</b>  <b>ILP Dinosaur Planet</b>  <b>Programmes of Study</b>  Observe closely using simple equipment</p>	<p>Simple equipment is used to take measurements and observations. Examples include metre sticks, measuring tapes, egg timers and hand lenses.</p> <p><b>Skills</b>  Ask simple scientific questions.</p> <p><b>Knowledge</b>  Question words include what, why, how, when, who and which</p> <p><b>Skills</b>  With support, gather and record simple data in a range of ways (data tables, diagrams, Venn diagrams)</p> <p><b>Knowledge</b>  Data can be recorded and displayed in different ways, including tables, pictograms and drawings.</p> <p><b>Skills</b>  Observe objects, materials, living things and changes over time, sorting and grouping them based on their features.</p> <p><b>Knowledge</b>  Objects, materials and living things can be looked at and compared.</p> <p><b>Skills</b>  With support, follow instructions to perform simple tests and begin to talk about what they might do or what might happen.</p> <p><b>Knowledge</b>  Simple tests can be carried out by following a set of instructions.</p> <p><b>Skills</b>  With support, use simple equipment to measure and make observations.</p> <p><b>Knowledge</b>  Simple equipment is used to take measurements and observations. Examples include metre sticks, measuring tapes, egg timers and hand lenses.</p>
<p><b>Y2 Autumn 1</b>  <b>ILP Street Detectives</b>  <b>Programmes of Study</b>  Observe closely using simple equipment</p> <p><b>Y2 Spring 1</b>  <b>ILP Muck, Mess and Mixtures</b>  <b>Programmes of Study</b></p>	<p><b>Skills</b>  Use simple equipment to measure and make observations.</p> <p><b>Knowledge</b>  Simple equipment is used to take measurements and observations. Examples include timers, hand lenses, metre sticks and trundle wheels.</p> <p><b>Skills</b>  Begin to notice patterns and relationships in their data and explain what they have done and found out using simple scientific language.</p>

<p>Use their observations and ideas to suggest answers to questions.</p> <p>Observe closely using simple equipment</p> <p><b>Y2 Spring 2</b>  <b>ILP Towers, Tunnels and Turrets</b>  <b>Programmes of Study</b>  Gather and record data to help in answering questions.</p> <p>Perform simple tests</p> <p>Observe closely using simple equipment</p> <p>Y2 Summer 1  ILP Scented Garden  <b>Programmes of Study</b>  Identify and Classify</p> <p>Use their observations and ideas to suggest answers to questions.</p>	<p><b>Knowledge</b>  The results are information that has been found out from an investigation and can be used to answer a question.</p> <p><b>Skills</b>  Use simple equipment to measure and make observations.</p> <p><b>Knowledge</b>  Simple equipment is used to take measurements and observations. Examples include timers, hand lenses, metre sticks and trundle wheels.</p> <p><b>Skills</b>  Use a range of methods (tables, charts, diagrams and Venn diagrams) to gather and record simple data with some accuracy.</p> <p><b>Knowledge</b>  Data can be recorded and displayed in different ways, including tables, charts, pictograms and drawings.</p> <p><b>Skills</b>  Follow a set of instructions to perform a range of simple tests, making simple predictions for what might happen and suggesting ways to answer their questions.</p> <p><b>Knowledge</b>  Tests can be carried out by following a set of instructions. A prediction is a guess at what might happen in an investigation.</p> <p><b>Skills</b>  Use simple equipment to measure and make observations.</p> <p><b>Knowledge</b>  Simple equipment is used to take measurements and observations. Examples include timers, hand lenses, metre sticks and trundle wheels.</p> <p><b>Skills</b>  Observe objects, materials, living things and changes over time, sorting and grouping them based on their features and explaining their reasoning.</p> <p><b>Knowledge</b>  Objects, materials and living things can be looked at, compared and grouped according to their features.</p> <p><b>Skills</b>  Begin to notice patterns and relationships in their data and explain what they have done and found out using simple scientific language.</p> <p><b>Knowledge</b></p>
---	---

	<p>Ask simple questions and recognise that they can be answered in different ways.</p> <p><b>Y2 Summer 2</b>  <b>ILP Wriggle and Crawl</b>  <b>Programmes of Study</b>  Gather and record data to help in answering questions.</p> <p>Use their observations and ideas to suggest answers to questions.</p> <p>Perform simple tests</p> <p>Observe closely using simple equipment</p>	<p>The results are information that has been found out from an investigation and can be used to answer a question.</p> <p><b>Skills</b>  Ask and answer scientific questions about the world around them.</p> <p><b>Knowledge</b>  Questions can help us find out about the world</p> <p><b>Skills</b>  Use a range of methods (tables, charts, diagrams and Venn diagrams) to gather and record simple data with some accuracy.</p> <p><b>Knowledge</b>  Data can be recorded and displayed in different ways, including tables, charts, pictograms and drawings</p> <p><b>Skills</b>  Begin to notice patterns and relationships in their data and explain what they have done and found out using simple scientific language.</p> <p><b>Knowledge</b>  The results are information that has been found out from an investigation and can be used to answer a question.</p> <p><b>Skills</b>  Follow a set of instructions to perform a range of simple tests, making simple predictions for what might happen and suggesting ways to answer their questions.</p> <p><b>Knowledge</b>  Tests can be carried out by following a set of instructions. A prediction is a guess at what might happen in an investigation.</p> <p><b>Skills</b>  Use simple equipment to measure and make observations.</p> <p><b>Knowledge</b>  Simple equipment is used to take measurements and observations. Examples include timers, hand lenses, metre sticks and trundle wheels.</p>
--	---	--

<p>LOWER KS2</p>	<p><b>Y3 Autumn 2</b> <b>ILP Predator</b> <b>Programmes of Study</b> Identify differences, similarities or changes related to simple scientific ideas and processes</p> <p>Record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables</p> <p>Gather, record, classify and present data in a variety of ways to help in answering questions.</p> <p>Make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers.</p> <p><b>Y3 Spring 1</b> <b>ILP Tremor</b> <b>Programmes of Study</b> Identify differences, similarities or changes related to simple scientific ideas and processes</p> <p>Record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables</p>	<p><b>Skills</b> Make increasingly careful observations, identifying similarities, differences and changes and making simple connections. Knowledge An observation involves looking closely at objects, materials and living things, which can be compared and grouped according to their features</p> <p><b>Skills</b> Gather and record findings in a variety of ways (diagrams, tables, charts and graphs) with increasing accuracy. Knowledge Data can be recorded and displayed in different ways, including tables, charts, graphs and labelled diagrams. Data can be used to provide evidence to answer questions.</p> <p><b>Skills</b> Gather and record findings in a variety of ways (diagrams, tables, charts and graphs) with increasing accuracy. Knowledge Data can be recorded and displayed in different ways, including tables, charts, graphs and labelled diagrams. Data can be used to provide evidence to answer questions.</p> <p><b>Skills</b> Take measurements in standard units, using a range of simple equipment. <b>Knowledge</b> Equipment is used to take measurements in standard units. Examples include data loggers plus sensors, timers (seconds, minutes and hours), thermometers (°C) and metre sticks (millimetres, centimetres and metres). Taking repeat readings can increase the accuracy of the measurement.</p> <p><b>Skills</b> Make increasingly careful observations, identifying similarities, differences and changes and making simple connections. Knowledge An observation involves looking closely at objects, materials and living things, which can be compared and grouped according to their features.</p> <p><b>Skills</b> Gather and record findings in a variety of ways (diagrams, tables, charts and graphs) with increasing accuracy.</p>
----------------------	---	---

<p>Gather, record, classify and present data in a variety of ways to help in answering questions</p> <p>Set up simple practical enquiries, comparative and fair tests</p> <p>Make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers.</p> <p><b>Y3 Spring 2</b> <b>ILP Mighty Metals</b> <b>Programmes of Study</b> Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions.</p> <p>Use straightforward scientific evidence to answer questions or to support their findings.</p>	<p><b>Knowledge</b> Data can be recorded and displayed in different ways, including tables, charts, graphs and labelled diagrams. Data can be used to provide evidence to answer questions.</p> <p><b>Skills</b> Gather and record findings in a variety of ways (diagrams, tables, charts and graphs) with increasing accuracy.</p> <p><b>Knowledge</b> Data can be recorded and displayed in different ways, including tables, charts, graphs and labelled diagrams. Data can be used to provide evidence to answer questions.</p> <p><b>Skills</b> Set up and carry out some simple, comparative and fair tests, making predictions for what might happen.</p> <p><b>Knowledge</b> Tests can be set up and carried out by following or planning a set of instructions. A prediction is a best guess for what might happen in an investigation based on some prior knowledge</p> <p><b>Skills</b> Take measurements in standard units, using a range of simple equipment.</p> <p><b>Knowledge</b> Equipment is used to take measurements in standard units. Examples include data loggers plus sensors, timers (seconds, minutes and hours), thermometers (°C) and metre sticks (millimetres, centimetres and metres). Taking repeat readings can increase the accuracy of the measurement.</p> <p><b>Skill</b> Use suitable vocabulary to talk or write about what they have done, what the purpose was and, with help, draw a simple conclusion based on evidence collected, beginning to identify next steps or improvements.</p> <p><b>Knowledge</b> Results are information that has been discovered as part of an investigation. A conclusion is the answer to a question that uses the evidence collected.</p> <p><b>Skills</b> Use suitable vocabulary to talk or write about what they have done, what the purpose was and, with help, draw a simple conclusion based on evidence collected, beginning to identify next steps or improvements.</p>	<p><b>Knowledge</b> Data can be recorded and displayed in different ways, including tables, charts, graphs and labelled diagrams.
