

	Autumn	Spring	Summer
Year 1	Shade and Shelter Designing and making shelters and dens	Taxi Mechanisms – wheels, axles and chassis	Chop, slice and mash Designing and making salads and sandwiches
Year 2	Remarkable Recipes Following recipes safely	Beach hut Structures – strengthening and joining	Cut, stitch and join Everyday fabric products
Year 3	Cook well, eat well Designing and making Taco fillings	Making it move Cam mechanisms	Greenhouse Features and construction of greenhouses
Year 4	Fresh Food, good Food Food preservation techniques	Functional and Fancy Fabrics Motifs and pattern, block printing, embroidery	Tomb builders Simple and compound machines
Year 5	Moving mechanisms Pneumatic systems	Eat the seasons Cooking and nutrition	Architecture Architecture over time, CAD, building design
Year 6	Food for life Whole foods and processed foods	Engineer Significant engineers and bridges	Make do and mend Investigating clothing

Why do we teach it in this order?

The design and technology projects are well sequenced to provide a coherent subject scheme that develops children's designing, planning, making and evaluating skills. Each project is based around a design and technology subject focus of **structures**, **mechanisms**, **cooking and nutrition** or **textiles**. The design and technology curriculum's electronic systems and IT monitoring and control elements are explicitly taught in our science projects to ensure the links between the subjects are highlighted.

Where possible, meaningful links to other areas of the curriculum have been made. For example, the cooking and nutrition project *Eat the Seasons* is taught alongside the geography project *Sow, Grow and Farm*. All the projects follow a structure where children are introduced to key concepts and build up knowledge and skills over time, using a more comprehensive range of equipment and building, cutting, joining, finishing and cooking techniques as they progress through school.

All projects contain focused, practical tasks in the Develop stage to help children gain the knowledge and skills needed to complete their Innovate tasks independently. Throughout Key Stages 1 and 2, children build up their knowledge and understanding of the iterative design process. They design, make, test and evaluate their products to match specific design criteria and ensure they fit their purpose. Throughout the projects, children are taught to work hygienically and safely.

Throughout the design and technology scheme, there is complete coverage of all national curriculum programmes of study.

Year 1

In the autumn term of Year 1, children begin to learn about structures in the project *Shade and Shelter* before designing and making a shelter. In the spring term project *Taxi!*, they learn the term 'mechanism' and assemble and test wheels and axles. In the summer term, children begin to learn about food sources in the project *Chop, Slice and Mash* and use simple preparation techniques to create a supermarket sandwich.

Year 2

In the autumn term of Year 2, children learn more about food in the project *Remarkable Recipes*, where they find out about food sources, follow recipes and learn simple cooking techniques. In the spring term project *Beach Hut*, children develop their knowledge of structures further, learning to cut, join and strengthen wood for the first time. In the summer term, children begin to develop their understanding of textiles in *Cut, Stitch and Join*. They learn to sew a simple running stitch, use pattern pieces and add simple embellishments.

Year 3

In the autumn term of Year 3, children continue to learn about food, understanding the concept of a balanced diet and making healthy meals in the project *Cook Well, Eatwell*. In the spring term project *Making it Move*, children extend their understanding of mechanisms by exploring cams and using joining and finishing techniques to make automaton toys. In the summer term project *Greenhouse*, they continue to develop their knowledge of structures, using triangles and braces for strength. They design and build a greenhouse, using their understanding of opacity and transparency and the needs of plants from science learning to inform their design.

Year 4

In the autumn term of Year 4, children continue to develop their understanding of food in the project *Fresh Food, Good Food*. They learn about food safety and preservation technologies before designing and making packaging for a healthy snack. During the spring term project *Functional and Fancy Fabrics*, children continue to explore textiles, learning about the work of William Morris before designing, embellishing and finishing a fabric sample. In the summer term project *Tomb Builders*, they build on their knowledge of mechanisms, learning about six simple machines and using their knowledge to create a lifting or moving device prototype.

Year 5

In the autumn term of Year 5, children deepen their understanding of mechanisms by studying pneumatic systems in the project *Moving Mechanisms*. They learn about the forces at play and create a prototype for a functional, pneumatic machine. In the spring term project *Eat the Seasons*, children continue to explore food and nutrition, learning about seasonal foods and the benefits of eating seasonally. In the summer term, they learn more about structures in the project *Architecture*, studying the history of architecture and developing new ways to create structural strength and stability. They use computer-aided design and consolidate their making skills to produce scale models. They also explore the electrical conductivity of materials before making products incorporating circuits in the science project *Properties and Changes of Materials*.

Year 6

In the autumn term of Year 6, children learn about processed and whole foods in the project *Food for Life*, creating healthy menus from unprocessed foods. In the spring term project *Engineer*, children consolidate their knowledge of structures, joining and strengthening techniques and electrical systems by completing a bridge-building challenge. In the summer term project *Make Do and Mend*, they extend their knowledge of textiles by learning new stitches to join fabrics and using pattern pieces to create a range of products.
