

Mighty Metals

Year 3's Curriculum Newsletter

Mighty metals are everywhere! From earrings to rockets, metals have shaped the world we live in today.

This half term, we're going to become fantastic physicists, exploring the world of forces, metals and materials. At a playground, we'll explore the forces that help us to slide and swing. Then, we'll bring toys from home to investigate how they work. We'll look closely at levers and explore how they help us to lift heavy objects. In maths, we'll have fun investigating where we need to sit to make a seesaw balance. To learn more about forces, we'll make spinners, play with parachutes and make magnetic games. We'll also investigate iron, think about why some metals rust and discover the properties of different metals. Using pots, pans and other metal objects, we'll compose a metal musical extravaganza and use our artistic skills to create embossed patterns and pictures.

ILP focus	Science
English	Suspense text – The Manor House, recount in the form of a letter.
Science	Forces and magnets
Art & design	Embossed patterns and pictures, making jewellery
Computing	Creating spreadsheets, using presentation software
D&T	Product evaluation, using research to inform design, selecting materials, making vehicles, using electrical circuits
Mathematics	Length and height, fractions, weight and capacity.
Music	Composition
PE	Using PE equipment to explore forces
RE	Holi, Vaisakhi, Easter

Help your child prepare for their project

Metals and magnets are everywhere! Why not do a hunt around the house to see how metal is used? You could also make fridge magnets using a flat magnet, glue and modelling clay or recycled materials. Alternatively, you could build models using blocks or recycled materials and investigate the force needed to knock them over!

Year 3's Notices

- Practise 2, 3, 4, 5, 8 and 10 times tables.
- Read with your child at home and remember to change reading books weekly.

Thank you for all your continued support.

Year 3 Staff
