

1) Complete the addition calculations that are represented below.

a)

H	T	O

b)

H	T	O

2) Use column addition to calculate:

a) $445 + 324$

b) one hundred and fifty-six add five hundred and forty-three

c)

1) Complete the addition calculations that are represented below.

H	T	O

H	T	O

2) Use column addition to calculate:

a) $445 + 324$

b) one hundred and fifty-six add five hundred and forty-three

c)

- 1) Jovan and Layla have both worked out the answer to $453 + 130$. Here is their working out:

Jovan

4	5	3	
+	1	3	0
4	6	6	0

Layla

	4	5	3
+	1	3	0
	5	8	3

Who is correct?

Explain the mistake made in the incorrect calculation.

- 2) a) Fill in the missing digits in this column addition calculation.

	7		6
+		2	3
	8	4	

- b) Fill in the missing digits. How many different ways can you find of filling in this calculation?

	3		
+		4	6
	5	6

- 1) Malia writes down the number 453.
She has the digit cards 3, 2 and 1.

She uses her cards to make a 3-digit number. She adds that number to 453.

The total is 684.

What 3-digit number did she make with her digit cards?

- 2) Bo used some base ten to make an addition calculation with a total of 637.

Using the same base ten pieces that Bo has, how many different pairs of 3-digit numbers can you find that add together to total 637?

One of the numbers must have 5 hundreds.
