

Dinosaur Quiz Answers

1. **What did dinosaurs eat?**

Some dinosaurs were carnivores (meat eaters) and ate other dinosaurs, animals, insects, sharks and fish. However, most dinosaurs were herbivores and just ate plants. Some dinosaurs were omnivores and ate both plants and animals.

2. **Where did dinosaurs live?**

Dinosaurs lived all over the earth. They lived on the ground, in the skies and in the seas.

3. **When were dinosaurs alive?**

Dinosaurs lived between 230 and 65 million years ago, in a time called the Mesozoic Era.

4. **Why did dinosaurs have sharp teeth?**

Meat eating dinosaurs had sharp teeth so they could rip the flesh from dinosaurs and other animals. They also had powerful jaws for crushing bones.

5. **Did dinosaurs eat people?**

Dinosaurs did not eat people because humans were not around at the same time as dinosaurs. Dinosaurs died out about 65 millions years ago and humans are only about 6 million years old.

6. **What does the word 'dinosaur' mean?**

The word 'dinosaur' means terrible lizard. Dinosaurs, like lizards and snakes were reptiles.
